### 賽馬會太陽能關懷計劃的運作模式

## Jockey Club SolarCare Programme

Jockey Club SolarCare Programme is funded by the Hong Kong Jockey Club Charities Trust, with a view to promote the use of renewable energy in Hong Kong as well as to develop a community service platform.

This programme is an active response to the Government's recent Feed-in Tariff (FiT) policy. Its mission is to accelerate the application of solar energy within the local community to increase the use of renewable energy and reduce carbon emissions. At the same time, this programme will serve to connect green groups, NGOs, government departments, power companies, renewable energy experts and the Hong Kong public at large. It is hoped that this can help Hong Kong catch up with the global level of renewable energy development and together we can build a Zero Carbon Hong Kong.

CarbonCare InnoLab will provide solar system installation, consultancy and maintenance service to the SolarCare Partners. Through this programme, our partners will:

- receive vetted professional solar energy system installation service under the supervision of CCIL.
- received a stable and long-term financial support for NGOs capacity building.
- enjoy longstanding maintenance service and energy-saving advice from professionals through CCIL network.

### Organisation Background

CarbonCare InnoLab (CCIL) is an independent community NGO dedicated to expanding the circle of people active on climate change innovation, education and action, with a strong focus on youth and students. We put special emphasis on multi-stakeholder engagement and solution-oriented processes, as well as awareness-building across the community.

Our mission is to encourage innovation that is both relevant to local needs and which contributes to solving global challenges. This includes climate justice, carbon reduction, resource conservation and action that will assist adaptation and resilience building. CCIL is registered as a charity and based in Hong Kong.
